

FREE DOWNLOAD · 2-MINUTE TEST

Does ChatGPT recommend you?

A two-minute test to see whether AI would put your business forward, and the specific things to fix if it does not.

Step 1 · Paste this into ChatGPT

I am looking for a [your service] in [your town].
Recommend a few good options and say why.

Then ask: "What about [your business name]? Would you suggest them, and why?"

Step 2 · What you are looking for

- ✓ Did your name come up on its own, before you asked?
- ✓ When named, is the description accurate and positive?
- ✓ Or did it say it had no information about you?

Step 3 · The signals that decide it

- ✓ **A clear one-line description**
so AI knows exactly what you are
- ✓ **Fresh reviews, on more than one site**
AI trusts what others say
- ✓ **Content that answers real questions**
AI quotes pages that answer
- ✓ **Named, real people on the site**
faceless brands get skipped
- ✓ **A current Google Business profile**
the source AI leans on most
- ✓ **Mentions beyond your own website**
listings, press, directories
- ✓ **Consistent name and details everywhere**
mixed signals confuse it
- ✓ **Clean, structured, fast pages**
easy to read is easy to cite

If your name did not come up

You are not invisible, you are just not legible to AI yet. That is fixable.
It is exactly what we do, and what Agent Console HQ measures for you.
